## Contents

1	Elsevier Paper	3
2	Application 1: Sinter Chute	3
3	Application 2: Raceway	3
4	Thesis	3

## List of Figures

## List of Tables

## **1 Elsevier Paper**

The paper for Powder Technology has been revised. An ulterior improved version, implementing the reviewers comments, has been submitted September the 10<sup>th</sup>. It can be found in the Publications folder.

## **2 Application 1: Sinter Chute**

I almost finished to work on the first application, only the particle distribution must be updated.

## **3 Application 2: Raceway**

I started to work on the raceway, using the old simulation setup by Hager. The first results show a relevant effect of the sliding friction over the raceway area size. I have started the geometry for the new one.

## **4 Thesis**

A new draft will be available by Monday the 21<sup>st</sup> of September.
