Contents

1	Conferences	3
2	Elsevier Paper	3
3	Application 1: Sinter Chute	3

List of Figures

List of Tables

1 Conferences

For the rest of 2015 the conferences planned are as follow:

- Particles 2015, Barcellona: participation confirmed;
- EANN 2015, Rhodes, participation confirmed;
- CFD 2015, Melbourne, paper sent for revision.

2 Elsevier Paper

The paper for Powder Technology has been revised. An improved version, implementing the reviewers comments, has been submitted June the 22nd. It can be found in the Publications folder.

3 Application 1: Sinter Chute

I continued to work on the first application, the Cooler Charging Chute of the Sinter Plant (CCCSP) for one of the industrial partner: PRIMETALS (ex-Siemens-VAI). A second version has achieved the necessary filling and now I will focus on the post-processing.
